Shakiba Davari (Ph.D.)

✉ sdavari@vt.edu — 🔗 LinkedIn — </> Website — 🎓 Google Scholar — ⓘ ORCID — Green Card Holder

STATEMENT — My work spans research and development at the intersection of human-computer interaction (HCI), UI/UX design, and applied machine learning (ML), with a focus on intelligent extended reality (iXR). I have designed and implemented context-aware AR solutions to address challenges like social and visual intrusiveness, conducted mixed-methods user studies to evaluate these solutions, and developed methodological guidelines for designing advanced XR interfaces. My expertise in programming, UI/UX design, mixed-methods research, applied ML, statistical analysis, and academic writing enables me to contribute effectively to the development of user-centered intelligent technologies.

ACADEMIC POSITIONS

Georgia Tech, USA   2025-Present
Postdoctral Researcher
H. Milton Stewart School of Industrial and Systems Engineering
>   *Lab:* Symbiotic and Augmented Intelligence Laboratory (SAIL)
>   *Supervisor:* Prof. Mohsen Moghaddam

EDUCATION

Virginia Tech, USA   2018-2024
Ph.D.in Computer Science & Application   *Degree Received: 2024*
>   *Dissertation Title:* Intelligent Augmented Reality (iAR): Context-aware Inference and Adaptation in AR [3]
>   *Advisor:* Prof. Doug. A. Bowman
>   *Ph.D. Committee:* Dr. Missie Smith, Dr. Wallace Lages, Dr. Yalong Young, Dr. Chris North

M.Sc. in Computer Science & Application   *Degree Received: 2020*
>   *Specialization:* Human-Computer Interaction

Georgia Tech, USA   2017-2018
M.Sc. in Computer Science
>   *Specialization:* Computational Perception and Robotics

Shahid Beheshti University, Iran   2010-2014
B.Sc. in Computer Engineering   *Degree Received: 2014*
>   *Major:* Computer Hardware

INDUSTRY EXPERIENCE

Adobe Research   Summer 2021
Position: Research Scientist Intern

Project: Context-Aware AR for Document Navigation
>   *Role:* Designed and developed 16 AR interfaces that use various contextual information to facilitate navigation through large document sets on iOS devices. Conducted a preliminary survey to evaluate the performance of these interfaces across multiple contexts and applied the design cycle to identify effective context-aware design principles for document navigation in each context.

Skills & Tools:	Apple ARKit, Swift, Adobe Aero, 3D Interface/Interaction (3DI) design, UX design, Mixed-methods research, Statistical analysis

Microsoft Research (MSR)   Summer 2020
Position: Research Intern

Project: *Exploring the Benefits of Virtual Monitors for Low-vision Population*

<u>Role:</u> Designed a VR tool to investigate the potential of virtual monitors as an assistive technology for low-vision users. Conducted a user study with 21 low-vision participants, from which I derived key design guidelines to enhance both hardware and software features of virtual monitors to better meet the needs of this population [9].

Skills & Tools:	User-centered design, Assistive technology development, UX research, Unity Game Engine, C#, Mixed-methods research, Statistical analysis

ZIEP Technical Company, Isfahan, Iran   Summer 2013
Position: Undergraduate Intern

<u>Role:</u> Supported system optimization and maintenance, addressing performance issues and ensuring operational efficiency.

Skills & Tools:	System Optimization, Performance Tuning, C/C++ Programming, Technical Support

ACADEMIC RESEARCH EXPERIENCE & PROJECTS

Virginia Tech   2018-2024
Position: Graduate Research Assistant

Project: *Guidelines and Frameworks for Designing XR & iAR Interfaces*

<u>Role:</u> Adopted a systematic approach to review and analyze the design challenges and capabilities of AR. This process involved iterative brainstorming and evaluation sessions to explore AR's diverse applications, task scenarios, and the types of data it can effectively convey. Using a comprehensive review of existing designs and research, I compiled preliminary lists of XR design elements and contextual components. These lists were continuously refined based on key AR interface features and external context factors identified in both solo and group sessions as influencing the user experience positively or negatively. This work ultimately led to several impactful guidelines, contributing to a comprehensive roadmap for intelligent AR (iAR) systems.

Key Contributions:

● **XR Design Space**: Identified the design dimensions of XR interfaces and proposed a design space for XR [4].
● **Taxonomy of Context**: Developed a taxonomy of quantifiable contextual components impacting AR efficacy [5].
● **Architecture for iAR**: Designed an architecture for context-aware inference and adaptation in iAR [5], [11].
● **Evaluation Framework for AR Input Modality**: Formulated a framework for evaluating AR input modality's effectiveness and conducted a comprehensive evaluation of the Eye input modality [2].
● **AR Interface Classification**: Proposed a classification methodology for AR interfaces and introduced "Glanceable AR" interfaces based on this classification [16], [18].

Skills & Tools:	Systematic Review and Analysis, 3DI Design, Framework and Taxonomy Development

Project: *User-Specified Adaptation in Various Contexts*

<u>Role:</u> Designed an empirical AR experiment to collect quantitative and qualitative data within a context-switching scenario. This experiment involved observing user behavior and capturing performance metrics, contextual details, and user-specified adaptations to AR interfaces across varying contexts. I conducted detailed analyses to identify patterns in user adaptations and examined their relationships to the context [5].

Key Contributions:

- **UI Design**: Informed by user adaptations, identified guidelines to improve AR interface design.
- **Data Collection**: Provided a preliminary training dataset tailored to this specific scenario for future iAR.

Skills & Tools: UX design, 3DI design, Mixed-methods research, Data analysis and Statistical analysis, Python, R, JMP, Academic writing

Project: *Adaptive XR Placement Strategy*

Role: Focusing on the spatial layout of XR content, I implemented both an adaptive placement strategy and a non-adaptive "Body-Fixed" placement strategy on Microsoft HoloLens devices. I designed and conducted a within-subjects user study to assess the effectiveness of these interfaces across four contextual scenarios, varying in social setting and user mobility [4].

Key Contributions:

- **Hybrid Frame of Reference**: Proposed using different references for each dimension of the XR object's spatial layout.
- **Environment-Referenced Placement**: Developed an adaptive placement approach using a relevant environmental object as an intermediary for positioning each XR object.
- **UI Design**: Identified guidelines to enhance AR content placement in various contexts.

Skills & Tools: Unity Game Engine, C#, Microsoft HoloLens development, MRTK, UX design, 3DI design, Mixed-methods research, Data analysis and Statistical analysis, Python, R, JMP, Academic writing

Project: *Intelligent AR for Social Contexts*

Role: Designed and developed a socially intelligent AR interface for HoloLens devices. This interface uses computer vision, face detection, and speech recognition to customize AR content display based on the user's social context and needs. To evaluate this AR interface's user experience and information access efficiency relative to mobile phones, I designed, conducted, and analyzed the collected quantitative and qualitative data from a user study with 36 participants [12].

Key Contributions:

- **UI Design**: Proposed an approach for integrating social context into AR design, significantly enhancing users' efficiency and social awareness during information access compared to today's mobile phones and non-adaptive AR.

Skills & Tools: Unity Game Engine, C#, Microsoft HoloLens development, MRTK, Photon Unity Networking, Python, OpenCV, Flask web app development, UX design, 3DI design, Mixed-methods research, Data analysis and Statistical analysis, SPSS/JMP, Academic writing

Project: *Occlusion Management in AR*

Role: Explored methods for managing the occlusion of real-world events in AR [13], [18]. Designed and implemented eight distinct techniques on a Lenovo Mirage Solo device and developed a simulated AR experiment to assess each technique's effect on user experience, real-world event awareness, and AR content access efficiency. Conducted a user study with 36 participants and analyzed both qualitative and quantitative data collected.

Key Contributions:

- **UI Design**: Identified guidelines to improve AR efficiency and user experience in occlusion-prone scenarios.

Skills & Tools: Unity Game Engine, C#, UX design, 3DI design, Mixed-methods research, Data analysis and Statistical analysis, Python, SPSS/JMP, Academic writing

Project: *OS-Level AR Interface*

Role: As part of a team, I designed and implemented OS-level features for an AR interface on a Microsoft HoloLens device, prototyping key functionalities to enhance user interaction, spatial organization, and real-world awareness.

Key Contributions:

- **Work-Zones in AR**: Introduced the concept of work zones, each with unique app groupings and layouts customized for specific tasks, along with multiple methods for seamless switching between zones.
- **Reality Button in AR**: Developed a simple, accessible method for users to hide and restore all AR content, allowing quick focus on the real world as needed.

Skills & Tools: 3DI design, Unity Game Engine, C#, Microsoft HoloLens development, MRTK, Teamwork

Project: Drill-AR: Enhanced Assembly Line Efficiency at Boeing Aircraft Company

Role: Collaborated as a team member to design and develop an AR interface with real-time feedback for Microsoft HoloLens aimed at optimizing the drilling process. Conducted a user study to assess the effectiveness of the interface in improving workflow efficiency.

Key Contributions:

- **AR-Enhanced Drilling Sequence Display**: Developed an AR interface to overlay the drilling sequence directly on the plane hull, removing the need for workers to consult paper plans and streamlining the drilling process.
- **Real-Time Progress Feedback:** Provided the user with real-time feedback on drilling progress to ensure accuracy.

Skills & Tools: 3DI design, Unity Game Engine, C#, Microsoft HoloLens development, MRTK, UX design, Teamwork

Project: Integrating Everyday Proxy Objects in VR

Role: Led a team of 10 graduate and undergraduate students to explore the use of physical proxy objects in creating an engaging and immersive VR experience [14], [19].

Key Contributions:

- **Tactile Immersion through Physical Proxies**: Developed a VR experience that integrates physical objects with storytelling elements, enhancing user engagement and immersion.
- **Efficient Use of Tracking Devices**: Designed a system to reuse a single tracking device across multiple physical proxies, optimizing resource efficiency in VR environments.

Skills & Tools: Unity Game Engine, C#, 3DI design, storytelling, Leadership, Academic writing, Teamwork

Other Team Projects and Collaborations

Role: Contributed to 3D interface and interaction design, interactive collaborative virtual environments, storytelling, programming, and writing for collaborative projects, including multi-year participation in the 3D User Interfaces (3DUI) contest at the IEEE VR

Key Contributions:

- **Best 3DUI Award 2022**: *Clean the Ocean*: Developed an immersive VR experience introducing new modifications to Go-Go and World in Miniature (WiM) techniques [10].
- **Best 3DUI Award 2021**: *Fantastic Voyage 2021*: Created an interactive VR storytelling experience to explain targeted COVID-19 vaccine delivery to antigen-presenting cells [15].
- **New 3D Interactions and AR/VR Techniques:** We introduced and developed various 3D interactions and interfaces to enhance VR collaboration, effectiveness, user engagement, and presence [1], [6]–[8], [10], [15], [17].

Skills & Tools: Unity Game Engine, C#, 3DI design, Storytelling, Leadership, Academic writing, Teamwork

Stanford University   2017-2018
Position: Visiting Researcher

Project: Leveraging Effects of Human Actions on Autonomous Cars Planning

Supervised by: Dorsa Sadigh

Role: Designed and developed driving simulation scenarios to gather driver data across diverse situations.

Skills & Tools: SimVista, SimCreator

University of Toronto — 2015-2016
Position: Visiting Researcher

Project: CARE-RATE: An online Assistive Technology Rating System for Caregivers
Supervised by: Frank Rudzicz

Role: Automated web crawling and data extraction to compile accurate, reliable information from target websites for Ludwig, a conversational robot designed to support Alzheimer's caregivers.

Skills & Tools: Selenium, Apache Nutch

Project: Automated Monitoring of Construction Progress Using Computer Vision and Robotics (InPRO)
Supervised by: Brenda McCabe

Role: Collaborated as a team member to research and implement machine learning, swarm intelligence, classification, and computer vision algorithms for automating UAV flight paths in dynamic construction environments to capture images [21], recognize construction progress states [23], [24], and automatically update the 4D Building Information Model (BIM) [20], [22].

Skills & Tools: Python2, OpenCV, Pymunck

TEACHING EXPERIENCE

Virginia Tech — 2018-2022
Graduate Teaching Assistant

Introduction to Artificial Intelligence	*Fall 2018-2022*
Professionalism in Computing	*Summer & Spring 2020*
Introduction to Human-Computer Interaction and Usability Engineering	*Spring 2021*

Student Science and Technology Centre, Isfahan, Iran — 2010-2012
Instructor

Introduction to Programming, C, C++
Verilog, VHDL
RoboCup Workshop

HONORS & AWARDS

Winning Team for Best 3DUI Award	*IEEE VR*	*2021 & 2022*
Departmental Service Award	*The Department of Computer Science at Virginia Tech*	*2020*
Inclusion, Diversity, and Accessibility Scholarship	*IEEE VR*	*2022*
Grace Hopper Celebration of Women in Computing Scholarship		
	Virginia Tech	*2022*
	Virginia Tech	*2021*
ACM Capital Region Celebration of Women in Computing Scholarship	*Virginia Tech*	*2020*
Tapia Celebration of Diversity in Computing Scholarship		
	Tapia Foundation	*2020*
	Virginia Tech	*2019*
	Georgia Tech	*2017*
Stanford SEF Award	*Bechtel International Centre, Stanford University*	*2016*
Fellowship for National University Entrance Exam Preparation	*Ghalamchi Foundation, Iran*	*2006-2010*
Exceptionally Talented Student	*The Department of Engineering at Shahid Beheshti University, Iran*	*2010-2014*
Sama Fellowship in Support of High School Education	*Nationwide Sama Private High School*	*2006-2010*

Ranked 1st in Nationwide Programming Contest	*Nationwide Sama Private High School*	*2009*
Ranked 3rd in Nationwide Math Contest	*Nationwide Sama Private High School*	*2008*

PROFESSIONAL ENGAGEMENTS

Invited Talks

Intelligent Augmented Reality (iAR)

	Building Construction Ph.D. Seminar, Georgia Tech	*Mar. 2025*
Towards iAR: Effective AR through Context-Awareness	*Center for Responsible AI at Coburg University*	*2024*

Context-Aware Inference and Adaptation in Intelligent AR Interfaces

	Workshop on Perceptual and Cognitive Issues in xR (PERCxR) at IEEE ISMAR	*2022*
AI and Everyday Augmented Reality	*Introduction to Artificial Intelligence (CS4804), Virginia Tech*	*2023*

Service

International Program Committee(IPC)	*IEEE ISMAR*	*2025*
Co-Organizer– Special Session: To Automate or To Augment? Advancing Cognitive & Physical Abilities in Industrial Workplaces	*IEEE International Conference on Automation Science and Engineering (CASE)*	*2025*
Conference Committee Member– Poster Session	*IEEE VR*	*2025*
Co-Organizer–The First Workshop on intelligent XR (iXR): Harnessing AI for Next-Generation XR User Experiences	*IEEE ISMAR*	*2024*
Conference Chair– Poster Session	*ACM Spatial User Interaction (SUI)*	*2024*
Conference Student Volunteer	*IEEE VR*	*2020 & 2021*
President– CS Graduate Student Council	*Virginia Tech*	*2020-2021*
Vice-President– CS Graduate Student Council	*Virginia Tech*	*2019-2020*
Vice-President– Iranian Society at VT	*Virginia Tech*	*2018-2021*
Judge– System Software and Intelligent Systems	*Virginia State Science and Engineering Fair*	*2020 & 2022*
